

ONLINE TRAINING ON LAB DIAGNOSTICS FOR ANIMALS AND ANIMAL PRODUCTS

Are You Involved In Laboratory Microbiology
Diagnostics As A Student, Researcher Or
Professional ?

Would You Like To Improve

Your Understanding And Broaden Your Knowledge On The Relevant State Of The Art Technology ? Would You Be Interested In Learning The Potentials And Limitations Of These Diagnostic Methods, But Cannot Join A Conventional Course ?

If Yes, The Lifelong Learning Program Of The Agricultural University Of Athens Titled "New Technologies In Veterinary Laboratory Diagnostics", Is Designed For Your Needs.

- Self-paced: lectures and study-notes always available online for 5 weeks.
- Offered Twice A Year : October and June.
- Endorsed by the European College of Veterinary Microbiology, (ecvmicro.org).
- You will be updated on challenges in public health protection, zoonotic diseases, and microbial drug resistance.
- You will gain insight into all the variations of PCR, isothermal amplification, genomics, proteomics, bioinformatics, next generation sequencing, optics, nanotechnology, and quality assurance in the molecular microbiology laboratory.
